

Mason-Lake Conservation District Fall Tree Pickup is October 17, 2015

We're going native for 2015! We've decided to offer school-spirit tulip bulbs for Pentwater, Ludington, MCC, MCE and Baldwin Public Schools: plant groups of 10 of them in October, & show your elementary, middle, & high school allegiance in May! To have room on the order form, only native trees & shrubs will be featured in our Fall 2015 sale!

You can still get non-native (but not invasive) Blue Spruce, Norway Spruce and Douglas/Frasier/Concolor Fir Trees from local nurseries, but you won't find them here this year! Orders can be picked up at the M-LCD/NRCS Conservation Office located in the USDA Service Center approximately 1 mile north of downtown Scottville. Please fill out the order form and return to our office, emails and faxes also accepted! **Orders should be placed no later than October 10th** and will be filled on a first-received basis. We reserve the right to cancel if required by our nurseries availability. The District can't be responsible for seedlings after pickup: plant trees before frost-set, give them plenty of water and protect them from deer & rodents to ensure the highest survival rate (on the back page, take a notice of our sale on deer protection items like tree tubes and plantskydd). Deer browse is the #1 threat to seedlings planted in Mason & Lake Co., protect trees in the Fall so deer don't kill them or eat the new growth by Spring!

Fall Tree Planting is recommended only for conifers and leafy evergreens on coarse textured soil (sand and loamy sands), soil that is well or moderately well drained.

Looking for something other than conifers? Don't forget our Annual Spring Tree Sale to be held in late-April, 2016. Tree Order Forms will be mailed out in the mid-January Newsletter.

We also have a variety of conservation products, including bird houses available for purchase anytime.
